

## Development of P30

Deadlines: January 25, May 25, September 25

Check with relevant IC, if P series applications are accepted, and when

### NIH Definition

To support shared resources and facilities for categorical research by a number of investigators from different disciplines who provide a multidisciplinary approach to a joint research effort or from the same discipline who focus on a common research problem. The core grant is integrated with the center's component projects or program projects, though funded independently from them. This support, by providing more accessible resources, is expected to assure a greater productivity than from the separate projects and program projects.

### Of Note

The P30 mechanism establishes and supports **RESEARCH CORES** in support of ongoing and future research in a specific area. It typically does **NOT** support research projects.

Some P30 mechanisms allow for pilot project and training program funding.

### Page Limitations

Please note that **page limits vary** by IC announcement, please check PAR/RFA you are applying to.

### Budget

- direct costs vary with IC, please check PAR/RFA
- up to 5 years

### Overall Components:

Overall components vary with RFA, but generally, at a minimum, contain the following components:

- Overall Component
- Administrative Core
- Research Support Core(s)
