Fax: (305) 243-2053
E-mail: resinfo@med.miami.edu

Office Hours:
Monday through Friday
8 am until 5 pm
**Velos eResearch Overview**

**Our Objective:**
To provide clinical researchers & study staff with user-friendly technology infrastructure for managing studies, tracking subjects, and facilitating analysis, while maintaining the privacy and safety of participants.

**The Process:**
Velos is being deployed by department for new and selected existing studies. For new studies from trained departments, PIs using the CRIS office will have easy access to use Velos as their study tracking tool. Research Billing (CRRC) will use the patient lists in Velos to minimize the chance of billing issues.

**Velos Basics:**
- Entirely web-based, accessible from any browser
- No new username & password, uses CaneID
- Coordinating tool for multi-site studies
- Fully-auditable, supports 21 CFR Pt 11 compliance

**Training Opportunities:**
Work with your department administration to find out when your department is scheduled to come on-line with Velos. The Velos support team has training delivery options in multiple formats. Contact the resinfo@med.miami.edu if you have any questions.

**Study Management:**
- Easily track completed events, visits, and forms
- Manage multiple study calendars as needed
- Use study arms to support a randomization process

**Reports Management:**
- Use a variety of canned reports to track your studies
- Administrators can track study performance without access to patient details
- Generate ad hoc reports to support analysis efforts
- Export data into different formats for analysis (e.g. Word, Excel, Print Friendly)

**Patient Management:**
- Track patient pre-screening and enrollment processes
- Easily edit visit schedules
- Set up notifications to remind staff of patient visits
- Track adverse events

**Administrative & Financial Management:**
- Set milestones based upon event, patient, visit, and study statuses
- Create invoices and track payables/receivables important to the study
